PROFESSIONAL SUMMARY

Dynamic Java Developer with expertise in Spring Boot, Hibernate, REST APIs, SQL, and backend development, along with proficiency in HTML, CSS, JavaScript, MySQL, and Git. Proven track record of delivering impactful software solutions through hands-on internship experience in software development and database management. Recognized for a quick learning curve and exceptional problem-solving skills, with a strong passion for creating scalable web applications that drive business success. Committed to continuous improvement and staying updated on industry advancements to enhance technical skills and deliver innovative solutions.

SKILLS

- Java programming
- Frameworks: Spring, Hibernate.
- Version Control: Git
- Relational database knowledge
- Operating Systems: Windows
- Programming languages
- Build Tools: Maven.
- Databases: MySQL
- Tools: IntelliJ IDEA
- Software development lifecycle

TECHNICAL PROFILE

- Java
- Spring Framework
- REST API
- Maven
- PostgreSQL
- Git & GitHub
- CSS
- OOPs Concepts
- Spring Boot
- Hibernate
- Microservices
- MySQL
- SQL
- HTML
- JavaScript
- JDBC

- Exception Handling
- Collections Framework
- Backend Development

WORK HISTORY

Software Engineer, 08/2025 - Current

Kavya Infoweb Pvt Ltd – Nagpur, India

- Developed and maintained scalable web applications using Spring Boot, React JS, and MySQL. Improved application performance by optimizing backend APIs and database queries, reducing response time by 25%. Integrated reusable components and modern technologies to enhance development efficiency and system scalability. Implemented debugging and testing strategies to reduce software defects and improve application reliability. Collaborated with cross-functional teams to develop and deploy responsive, user-friendly software solutions. Built secure RESTful APIs with JWT authentication and role-based authorization for protected user access. Contributed to frontend development using HTML, CSS, JavaScript, and React JS to improve UI responsiveness. Participated in code reviews, bug fixing, and feature enhancement activities in Agile development environments. Developed scalable and maintainable code to ensure long-term software stability and performance.

Internship Trainee, 03/2024 - 05/2025

MKP IT SERVICES PVT LTD – Nagpur, Maharashtra

- Developed and maintained scalable web applications using Spring Boot, React JS, and MySQL. Built and integrated RESTful APIs for user and transactional data management. Implemented JWT-based authentication and role-based authorization for secure access control. Designed responsive UI components using HTML, CSS, JavaScript, and React JS. Optimized database queries and backend performance for efficient data processing. Collaborated with cross-functional teams to debug, test, and deploy application features. Improved application reliability through debugging and performance optimization techniques.

EDUCATION

MCA: 01/2019

Sinhgad Institute Of Management - Pune

- Year of passing -2019
- GPA: 60%

BCA: 01/2016

G H RAISONI - Nagpur

- Year of passing -2016
- GPA: 51%

PROJECTS

Projects RxIncredible – Full Stack Web Application

- Developed a scalable healthcare and e-commerce web application using Spring Boot, React.js, and MySQL for prescription analysis, online pharmacy services, and user management.
- Designed and implemented RESTful APIs using Spring Boot, Hibernate, and JPA with JWT-based authentication and role-based authorization.
- Integrated secure payment gateway functionality for online medicine orders and transaction processing.
- Analyzed and enhanced features of RxIncredible.com including prescription workflows, pharmacy management, and responsive user experience.
- Built protected frontend routes and optimized application performance, validation, and database operations.

Hospital Management System – Full Stack Web Application

- Developed a comprehensive hospital management system using Spring Boot, React.js, and MySQL.
- Implemented modules for managing patients, doctors, appointments, and billing records efficiently.
- Designed RESTful APIs using Hibernate/JPA for CRUD operations and secure database handling.
- Implemented JWT-based authentication and role-based access control for Admin, Doctor, and Receptionist roles.
- Built a responsive UI and optimized validation, security, and performance for smooth hospital workflow management.
